

## TAM 114 Replaces Top Wheat Variety Planted in 2020

This report contains the results from the 2020 Wheat Variety Survey which was conducted from a survey of Texas wheat producers in December 2019 through January 2020. Producers were asked to report wheat acres planted and to be planted, by variety, for the 2020 crop year. The survey was funded by the Texas A&M AgriLife Extension. Survey results are provided in the following tables, with percent of acres planted for the 2020 crop year, by variety, by AgriLife Extension Districts. Data provided by Texas wheat producers is the foundation of this report. The Southern Plains Regional Field Office sincerely appreciates the support and cooperation of all producers who provided input to the survey.
