

Texas Wheat Varieties Planted for 2017

The USDA-NASS Southern Plains Regional Field Office conducted a survey of Texas wheat producers in December 2016 through January 2017. Producers were asked to report wheat acres planted and to be planted by variety for the 2017 crop year. The survey was overseen by Texas A&M AgriLife Extension and funded by the Texas Wheat Producers Board and Texas Seed Trade Association. Survey results are provided in the following tables, with percent of acres planted for the 2017 crop year by variety and broken out by Texas AgriLife Extension Wheat Region. Data provided by Texas wheat producers is the foundation of this report. The Southern Plains Regional Field Office sincerely thanks all producers who cooperated in this important survey.

The TAM 111 and TAM 112 remain the top two varieties producers have planted or will plant for the 2017 crop. The TAM 111 variety remains the leading variety planted in Texas, accounting for 13.7 percent of the State’s 2017 planted wheat acres, down from 17.6 percent in 2016. The TAM 112 variety ranked second, accounting for 4.7 percent of acres planted for 2017, compared with 6.9 percent last year. The TAM 113 variety ranked third with 3.1 percent of the State acreage compared with 3.1 percent in 2016. Gallagher, with 2.8 percent moved up 6 spots to fourth from tenth position last year. WB Cedar, with 2.6 percent of the State acreage moved up 4 spots to fifth for 2017. Greer accounts for 2.2 percent of the 2017 acreage, up two positions to sixth. Fannin fell to seventh from sixth last year, with 2.2 percent of the State acreage. The Weathermaster 135 variety, with 2.1 percent of the acreage also dropped one position to eighth for 2017. TAM 401 entered the top 10, ranking ninth with 2.0 percent of the acreage up from eleventh last year. TAM 105, with 2.0 percent of the acreage fell 5 positions to round out the top 10 varieties.
